

For Prestige and Advanced Series

Use this method to return results quickly above 100km (We recommend using this method when doing all searches). Similar to an Atlas you must first select the area to look in 'A Different City' and then select your point of interest. Here's How...

1 Press Where to?

2 Press Searching Near

3 Select 'A Different City'

4 Enter 'Nearest Location ie nearby town'

5 Type the Legal Location

6 Select Search Results

7 Press 'Go'

8 Select here for more Info

9 Turn by Turn and Drive Details

Important Set-Up

1. Keyboard Layout - ABCDE (not QWERTY)
2. Map Detail set to Most (or More)
3. If doing a Firmware update on your device through Garmin, be sure to remove your AgMap SD Card.

AgMap

Close Proximity Method
Slower...but fewer button pushes.

You can use this method when searching in close proximity of the location. ~ 50km

NE-33-71-6-W6

Notice there are no leading zeros in the numbers

eg. "7" is not written as "07"

1 Press Where to?

2 Type the Legal Location

3 Select Search Results

4 Press 'Go'
