

## Important Steps for Set-Up

When using PatchMap in your Garmin GPS there are a few simple steps to ensure you are getting the most of your maps.

1. Insert your SD or Micro SD card into your Garmin GPS
2. Turn the unit off and turn it back on to ensure the unit is reading the maps
3. Turn off your City Navigator (these are the standard maps that come in the Garmin GPS, you will not need these when navigating with PatchMap)

### 4. Settings

### 5. Select Map & Vehicle

### 6. Scroll down to myMaps

### 7. Select myMaps

### For PatchMap turn off CN NA

### For Standard City Maps turn off PatchMap

### Change your Keyboard Settings

### Select ABCDE (this will make your LSD search easier)

### In Map Detail choose the highest level
